

Dear Sir/ Madam,

Greetings. I want to take this opportunity to explain to you what the (ISC)² Safe and Secure Online program is and how it can benefit your community/school.

The Center for Cyber Safety and Education (Center) is a non-profit charitable trust that aims to empower the public to secure their online life by supporting cyber security education and awareness in the community. This is in part accomplished through the Safe and Secure Online program. The Safe and Secure Online program is an initiative that brings volunteers into the community to teach cyber safety to children, parents, and senior citizens.

I am writing you today to offer my volunteer services to teach the children/parents/senior citizens within your school/organization to stay safe online.

Topics covered in the children's presentation include cyberbullying, online identity and image protection, social networking safety, and computer safety.

Topics covered in the parent's presentation include cyberbullying, online identity and image protection, social networking safety, and computer safety.

Topics covered in the senior's presentation include online identity and image protection, scam identification, social networking safety, and computer safety.

I am a volunteer living locally and would be happy to bring this amazing program to your school/organization. This presentation has been created by the Center with the help of the world's leading cybersecurity professionals: the certified global members of (ISC)². The presentation is delivered via Power Point and is one hour long. For more information about the Center and the Safe and Secure Online Program, please visit www.SafeAndSecureOnline.org.

Please contact me if you are interested in bringing this program to your school/organization. I look forward to speaking with you soon! Together, we can make a difference in helping the community stay safe online.

Sincerely,

Signature (include phone and/or email)
